- The login section allows users to securely access the POS system. It includes fields for **Username** and **Password**, a **login button** to enter the system, and a **forgot Password** option for recovering account access.

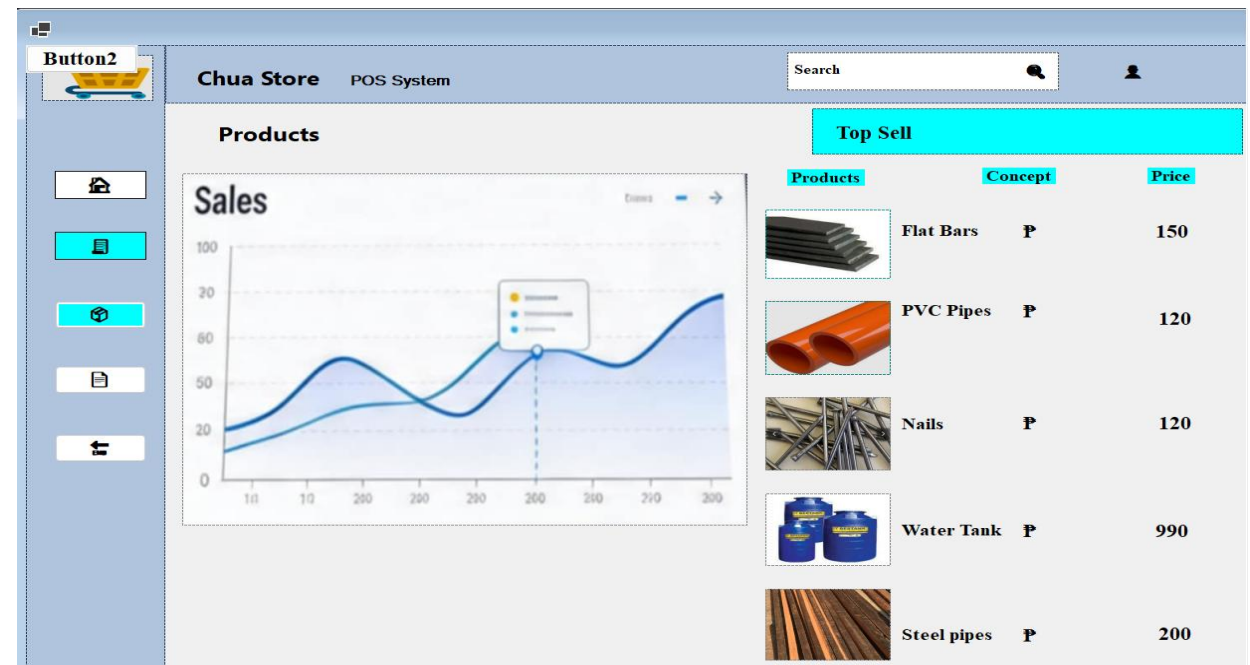

- The dashboard section shown in the image displays different types of Reports such as the **Sales Report**, **Employees Report**, **Transaction Reports**, and **Financial Report**. It presents key details including total sales, number of transactions, receipt information, employee performance, and overall profit, along with daily summary for monitoring daily cash flow.

The sales section provides an overview of current sales performance and transactions activity. It displays key details such as **Today's Sales**, **Item Sold** and **Top Product**, along with **Weekly Sales Report** and **Monthly Sales Report** summaries. It also includes a daily sales Trend chart for visual analysis and a Recent Transactions section to track the latest sales made.

The products section displays a list of available items along with their details. It includes a **Sales chart** for visualizing product performance and a **Top Sell panel** highlighting popular items. Each product shows its name, **image**, **concept/ category**, and **price**, allowing users to easily view and manage product information.
